Art Unit: 2621

1. The disclosure is objected to because of the following informalities: The current status of U. S. patent application number 09/590,928 cited in the first paragraph of the specification must be updated.

Appropriate correction is required.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-5, 8-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-8 of U.S. Patent No. 6,647,061. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences between claims 1-5, 8-12 and patent claims 6-8 would have been obvious to one of ordinary skill in the art. For instant, the patent claims 6-8 include all the claims limitations of claims 1, 3-4, respectively. The features of claims 2, 5 are well known in the art (Official Notice). It would have been obvious to one of ordinary skill in the art to use such well-known features in the patent claim 6 for the purpose of downsampling a DCT block. Claims 8-12 are simply directed to an apparatus corresponding to the method of claims 1-5. Therefore, they are also considered obvious over the patent claims 6-8 for the same reasons.

Art Unit: 2621

4. Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prakhaker et al and Yim are cited for disclosing various techniques for resizing a DCT block.
